NEED FOR INDIAN IT PROFESSIONALS IN JAPAN

When engineers increasingly face shrinking job opportunities and layoffs in India and immigration restrictions abroad, there is one country which wants them in large numbers — Japan. The country immediately needs **2,00,000** information technology (IT) professionals, and the demand is likely to grow to **8,00,000 by 2030**.

India and Japan have signed a 'Technical Intern Training Program (TITP)', under which India plans to send three lakh youths to Japan for on-job training for three to five years as part of the government's skill development programme. Japan will bear the financial cost of the skill training of Indian technical interns. About 50,000 of them may also get jobs in Japan.

Indo-Japanese ties ride high

JAPAN DEMOGRAPHICS

Over a third of the Japanese population today is over 65 years, the International Longevity Centre has found.

Japan's population is aging faster than that of any other nation

In 2014, 26% of Japan's population was estimated to be 65 years or older, and the Health and Welfare Ministry has estimated that over-65s will account for 40% of the population by 2060.
