

**A Report on One-Day Workshop on “Big Data Management”
Organized by Computer Science and Engineering Department**

DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

With an objective to acquaint the students with basic knowledge of big data management, topics that are not included in the present curriculum, Computer Science and Engineering Department has conducted a One-day workshop through online mode for UG students in the departmental seminar hall from 10 am to 5 pm on 12th September 2020.

The program was inaugurated by Dr R. Kalpana Professor., HOD, CSE along with an inaugural speech highlighting the importance of these technologies in the present-day context.

The resource person Dr P. Ilango started his talk with an introduction to big data analytics. He moved on to big data management, the principal framework used for big data management, and explained in detail the techniques.

In the afternoon session, he explained the importance of big data and big data connection with machine learning with the help of some algorithms. And finally, he explained the usage of big data management with real-time examples.

Last one hour he given chance to students to interact regarding big data management and clarify students' doubts with examples.

After completion of the workshop programme regarding bid data management Dr J. Subash Chandra Bose, Associate Professor, concluded with closing remarks.

The event was a successful one. The workshop was relevant to the title and was well-appreciated by the students. After completion of this workshop, students have felt encouraged to explore these technologies further and to take up project work in these current areas.

Thank you

With regards
Dr J. Subash Chandra Bose,
Associate Professor, CSE.
